# WORKING TOWARDS SAVING CROPS

.....  
We believe agriculture is the key to change the world.

Introducing Agrico Organics Ltd. (AOL), a leading provider of innovative and effective pest control solutions. Since our establishment in 1995 by Mr. K.K. Gupta, we have been committed to providing safe, reliable products to farmers and businesses across the country.

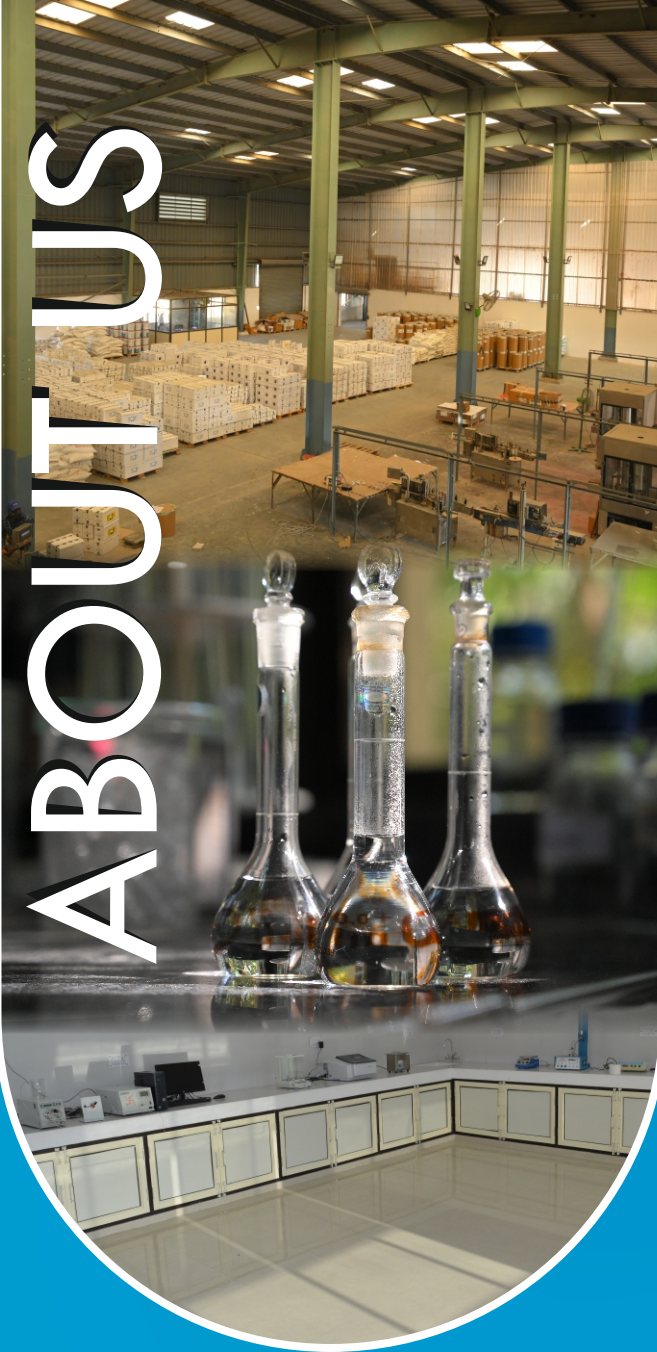

After initiating B2B platform of technical grade Pesticide, we set up a team of experts who work tirelessly to research and develop cutting edge technology and for further expansion & diversification, we launched our very own marketing brand and started a formulation unit in Haryana in the year 2004.

At AOL, we understand the importance of protecting the farmers and building their trust. Our commitment to excellence has earned us the trust of many satisfied customers and in short span of time with continued growth we introduced two more formulation units in Jammu & Kashmir (2012) and Gujarat (2016).

In 2021, AOL took a significant step to strengthen the organization by going into backward integration and started our own Technical Grade manufacturing plant in Gujarat.

We are proud to have a reputation for exceptional customer service and quality workmanship and we strive to maintain that standard in every job we do and we are likely to continue to evolve and grow in the years to come.
